PROJECTS

- **Blog API Project** | [LINK](#)
Built a project that implements a straightforward RESTful API designed for handling blog post management. It offers functionalities to create, read, update, and delete blog posts.
(Used NodeJS, ExpressJS, EJS, CSS etc.)
- **Amazon Clone** | [LINK](#)
Built a frontend clone of the Amazon website. It aims to replicate the look and feel of the Amazon website while also implementing responsive design principles for optimal viewing across various devices. It is designed to emulate the layout and the features of the Amazon homepage to demonstrate frontend web development skills.
(Used HTML, CSS, JavaScript etc.)
- **Text to Speech Converter** | [LINK](#)
Built a Text to Speech Converter . This simple web application allows users to enter text into a text area, select from a variety of voices, and have the entered text spoken aloud.
(Used HTML, CSS, JavaScript etc.)
- **Blackjack Card Game** | [LINK](#)
Built a console-based implementation of the classic card game Blackjack. The game employs object-oriented programming principles, utilizing classes and functions for an organized and modular structure.
(Used Python)
